Top 3 Marketing Recommendations

01

Smart notifications to combat sedentary behavior

Users are inactive 83% of the day. Bellabeat can differentiate itself by sending "active break" reminders during periods of low activity, turning the app into a proactive wellness coach.

Insight: 993 min/day sedentary on average

02

Sleep campaign as holistic women's health

34% of users sleep less than 7 hours (WHO). Position Bellabeat's sleep tracking as an exclusive tool for women's well-being, with content on sleep and the menstrual cycle.

03

Smart timing: Mondays and Wednesdays

Peak activity occurs on Mondays and Wednesdays. Scheduling social media campaigns, email marketing, and push notifications during these periods maximizes engagement and conversion to Bellabeat Membership.

Insight: +18% more steps vs. Tuesday

Thank You

The data reveals a subactive user with sleep deprivation.

Bellabeat has the opportunity to be the smartest female wellness coach on the market.
